# METRC COMPLIANT

CALIFORNIA  
OKLAHOMA  
MICHIGAN  
MISSOURI

Stay legal through product tracking, traceable chain of custody, regulatory reporting, automated and secure record keeping and audit trail.

TRIDANT Seed-to-Sale (4S) Suite App makes harvesting efficient with the ability to scan plant tags from any smart device.

# KEY HIGHLIGHTS

SEED-TO-SALE  
CANNBIS  
SOFTWARE

## CULTIVATION

■ User-friendly seed software enables plant growth management from seed to harvest through easy to use icons representing growth stages.

This platform consumes data from your grow activities and environmental sensors letting you know the optimal grow conditions. Take advantage of these insights that are generated for you to save time while ensuring top quality.

## PROCESSING

□ Results of your product potency and safety testing are available in real-time and automatically linked to the product's digital chain of custody.

Automated product recall (mandatory or voluntary) alerts State agency and limits risk to patients.

## DISPENSARY POS

■ All-Inclusive Cannabis Retail System. Interactive dashboard with live monitoring of your business performance. Online/Offline feature allows you to continue sales transactions even if you lose internet connection.

## DISPENSARY POS

All-Inclusive Cannabis Retail System.

## STAY COMPLIANT

Stay METRC compliant with our product tracking and tracing features.

## CUSTOM WEBSITE

Build your own custom website easier than ever.

# BRANDS WE'VE HELPED

# REPORT MANAGEMENT

## SALES

Full breakdown of sales. Tracking of your best and worst selling products, trend reports, and sales demographics.

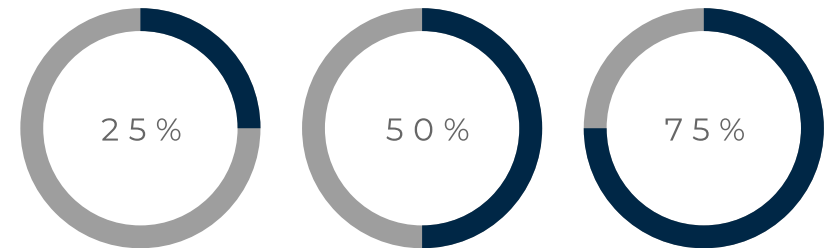

## GROWHOUSE

Use our software to predict your crop yields based off historical plant inventory.

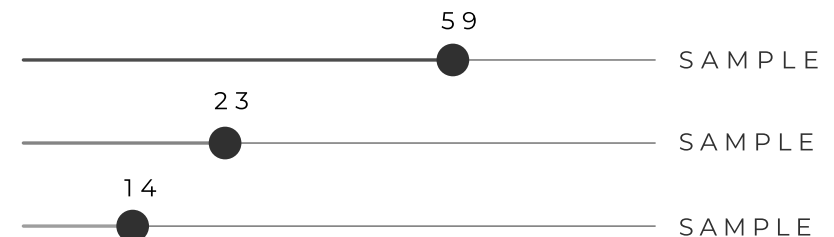

## PRODUCTION

Keep detailed reports on your production processes and have a constant overview of how much product is produced per shift.

- Keep detailed sales reports with a breakdown of sales based off category, date, and time. Track your discounts by staff and product so you always know what discounts are being used. Stay up to date on the money aspects of your business.

- Keep detailed reports on your growhouse to efficiently run your cultivation. Yield statistics based off historical plant inventory, and more importantly grow cost tracking.

- Keep detailed reports on every extraction and kitchen process your business conducts. Use these reports to oversee what is being produced per shift and as a guide for employees to follow proper procedures and protocol.
